*Profession Creates Perfection*

# COMPANY PROFILE

Established in 1998, Protex is a professional flooring supplier with more than 16 years export experience. We have 4 production bases which provide SPC flooring, WPC flooring, LVT flooring, HPL Wooden flooring and EIR HPL.

There are 18 production lines for SPC and 22 production lines for SPC, 2 printing decor lines and 3 profiling lines. We have 120m Annealing facility which is the longest in China. Our monthly production is around 210 containers. Meanwhile there are 7 color film factories supporting us to ensure fast delivery and develop new designs.

Our bases have powerful R&D ability and are constantly developing new products with SPC core and different top layer. We have professional QC team and laboratory for high standard quality control.

We have sales office in South Korea more than 14 years of experience in market operation, our EIR HPL has the largest market share in Korea, we are still increasingly expand the market all over the world such as South East Asia, North America, Western Europe, Oceania, South America etc.

We are looking for global partners who experienced flooring distribution or sales representative, we guarantee on-time delivery, reliable quality of various waterproof SPC/WPC/LVT flooring. With our supply chain ability and your local service advantage, we work for your benefits and lifetime friendship.

Profession creates perfection, looking forward to working with you.

## LVT Flooring

LVT not only simulates wood grain and stone grain in appearance, but also serves as an elastic floor made of PVC material. LVT is also a floor with unique charm. -- elasticity, different from hard materials such as stone and ceramic tile, LVT imitation stone floor gives people a more comfortable experience. -- both hygienic and anti-skid, LVT floor has unique anti-skid ability, and at the same time, it ensures enough anti-fouling ability and is easy to clean. -- mould-proof and insect-free, wear-resistant and durable, LVT floor bottom layer is a mixture of lime and PVC, with good stability; The surface layer is pure PVC wear resistant layer, high wear resistance. LVT has the advantages of scientific and technological products compared with wooden floors, which are prone to deformation and the risk of insects.
